54-55 Important Information

Welcome to eferno

A new range of high-quality and innovative electric fires carefully designed to give probably the most realistic looking fire of its type available today, with superb and versatile controllability using either manual control, handheld remote control, or specially developed eferno Smart Control APP control with an extensive range of special features offered as standard.

The eferno range has been designed to offer many configurations and sizes, enabling a stunning focal point to almost any room, including a range of complimentary fireplace suites that can be simply installed onto a flat wall. With Global warming and ever-present pollution, there has never been a more urgent time to consider an eferno electric fire as a more environmentally friendly solution and making it a perfect choice for a high quality and extremely realistic fire that can be enjoyed for many years to come.

BRITISH INNOVATION

Advantages of eferno electric fires:

- No requirement for a chimney
- Zero heat loss through the chimney as not required
- Economical installation costs when compared to gas and solid fuel appliances
- More environmentally friendly as zero combustion from the appliance
- Healthier internal and external environment when compared to solid fuel stoves
- Lower maintenance and service costs compared to gas and solid fuel appliances
- More versatility to the installation position, all that is needed is a suitable and serviceable mains power socket nearby and a suitable flat wall
- Realistic flame and log effect
- Versatile control
- Very low running costs to the flame and log effect
- High efficiency

Outstanding eferno standard features

eferno all in 1 design with the option of 1, 2 or 3 viewing windows to most models depending on the configuration required.

eferno Energy efficient LED'S used for the flame, ember bed, shimmer lights and log down lights with very low running costs.

eferno innovative, highly realistic, and high-definition flame technology.

eferno High Tech PTC fan heater with the benefit of improved safety and efficiency. (Supplied as standard to the Azar, Egan & Phoenix range).

eferno flame synthesis technology.
Allows flame colour mixing with brightness control.
Ultimate realism creating probably the most realistic fires on the market today.

eferno range of 15 flame colours with brightness control.
15 ember colours with brightness control.
15 downlight colours with brightness control.
Flickering fuel bed for ultimate realism.

eferno Shimmer light technology creating the illusion of various front logs to glow orange and then fade at preset intervals emulating a shimmering natural log burning fire, all automatically controlled.

eferno Premium hand-crafted genuine kiln dried hard wood logs for ultimate realism, with a choice of either Woodland Oak or Forest Ash log sets.
Mixture of ember bed crystals and bark chippings.

eferno controls

Each fire has the option of being controlled by either using the manual controls, handheld remote control, or eferno App control.

eferno Manual control features:

- On / Off switch.
- Standby key.
- Mode key. Scrolls through a selection of pre-programmed fire scene effects.
- Brightness Key: Simultaneously controls the brightness to the flame, ember bed and log down lights.
- Heat Key: Switches on the fan heater with a choice of low or high setting.

eferno Remote control features:

- 15 Independent colour settings to the flame, ember bed and log down lights.
- Simultaneous brightness control.
- Selection of 4 Flame speeds.
- Automatic front log shimmer control on / off.
- Selection of 6 crackling sounds.
- Crackling sound volume control.
- Selection of 15 pre-programmed fire scenes.
- Demo function automatically scrolls through different fire scenes.
- High and low heat settings.
- Temperature control.
- Adaptive control.

eferno App control Features in addition to the hand - held remote features:

- eferno Smart Control App. Easy to use iOS and Android App with advanced features giving the ultimate control. (Download required). Amazon Alexa compatible.
- eferno App technology enables ultimate control to the flame, log and ember bed enabling colour changes through an easy-to-use colour spectrum wheel giving extensive colour possibilities depending on the user's preference.
- eferno App independent control of brightness to the flame, ember bed and log down lights.
- eferno App flame synthesis technology. Enables various colours to be mixed with the default orange colour flame allowing the user to create extensive exciting flame colours. Both can be independently controlled for brightness.
- eferno App 7-day programmable control.
- eferno App Sync control synchronises the colour of the flame, ember bed and log down lights.

eferno Optional extras:

- eferno LED mood lighting kit, with the option of hand-held remote or App controlled. (Exception Alinta Models).
- Anti reflective glass.
- Simulated flue pipe to the Phoenix stove range.

Peace of mind:

- Safety tested to the latest CE, UK/CA standards.
- UK/CA approved.
- The glass used to manufacture the front and side panels independently tested to British Standards.
- 3 Year guarantee * Subject to terms and conditions. (Go to our website www.newmanfireplaces.co.uk for full details).

Hand crafted genuine hardwood log sets as standard

Premium eferno hand-crafted Woodland Oak logs

Premium eferno hand-crafted Forest Ash logs

eferno control options

All eferno fires are supplied with manual controls, a hand-held remote control plus the ability to use the highly controllable eferno Smart Control App (Download required).

Manual control

Handheld remote-control

eferno APP

eferno 15 pre-set fire scenes

All eferno fires have the facility to select from 15 preset fire scenes, in conjunction with the pre-set scene the Shimmer lights can also be selected giving potentially a staggering 30 scene options, examples of the 15 fire scenes and examples with the Shimmer lights selected shown below.

eferno Mood lighting

The eferno Azar EL-FD range, Egan EL-SL range and Phoenix stove range are available with an LED mood lighting kit as an optional extra, powered direct from the appliance. Easily controlled by an independent hand-held remote control or App giving versatility of thousands of mood lighting configurations. Ideal if you wish to create ambient mood lighting to media walls, fireplaces, and other suitable structures.

Examples of how LED mood lighting can be used

Fireplace lower hearth mood lighting

Fireplace shelf mood lighting

Media wall mood lighting surrounding TV

Chamber mood lighting

eferno Option of 1, 2 or 3 glass panel viewing

Most of the eferno electric fire range is supplied as standard with a versatile interchangeable glass viewing area allowing a 1-sided, 2-sided, or 3-sided glass viewing window configuration to cater for many installation options.*

1-Sided

2-Sided

3-Sided

* Exception: Egan 570-SL, front viewing only. Alinta inset models front viewing only. Phoenix 555-T stove supplied with 3-sided viewing windows as standard.

eferno Azar FD Range

- Full depth fires offered in a range of sizes to suit almost any room.
- Ideal for installation into a suitable false media wall or chimney breast.
- Possibility to install into a suitable conventional chimney subject to dimensions.
- Each appliance is supplied with a manual control, hand-held remote control, and facility for App control.
- eferno 1, 2 or 3 viewing windows depending on the configuration required all from 1 fire.
- eferno Complete range of outstanding standard features. (See pages 4 - 5)
- eferno High Tech PTC fan heater with the benefit of improved safety and efficiency. (1000 – 2000)w.
- eferno Genuine hand-crafted wood logs option of: Woodland Oak or Forest Ash.
- eferno Outstanding realism to the flame effect.
- eferno Outstanding Shimmer light technology brings the fire ALIVE creating the illusion of various front logs to gradually glow orange and then fade at preset intervals emulating a shimmering natural log burning fire, all automatically controlled.
- Running costs approximately from only 1.3 pence per hour depending on the eferno model. *
- CE, UK/CA approved.
- eferno Azar FD models are available separately.
- Fireplace suites compatible with various Azar FD models for FLAT WALL FIX are available as shown within this brochure.

View our full range of fireplaces in our Newman Fireplace Designer Collection brochure or go to www.newmanfireplaces.co.uk many designs can be adapted by our stone masons to accommodate many of the Azar-FD electric fires.

- Genuine marble mosaic chamber panels. (Option of other chamber designs).

Important Information

- All eferno electric fires and mood lights must be installed by a suitably qualified and competent electrician to all relevant and current Building Regulations, any Rules in Force, and the manufacturer's instructions.
- All products are either protected by patents, registered design, copyrights, and intellectual property rights. Newman Fireplaces Ltd will protect these rights.
- All specifications are subject to change without prior notice.
- All goods should be inspected for quality and damage before installation, no refunds will be given regarding this after the product is installed.
- The eferno electric fires shown in this brochure have been designed to offer an outstanding simulated log effect that can be enjoyed all year round, the built in fan heaters are not suitable as a primary heat source, although they may provide a secondary heat source to the room the fire is installed, this can vary widely depending on the size of room and how well the room is insulated therefore no guarantees can be made to the effectiveness to the room temperature when the fan heater is used.
- We pride ourselves with detailed inspection and selection of each and every raw stone block we use for fireplace manufacture and every process thereafter, however stone is a natural material and variation will occur, this will include shading, veining, fossils, and crystal markings etc. This is the beauty of natural stone and sets it apart from a man-made counterpart.
- Every effort has been made to show correct colour representation, although no guarantees can be given due to the printing process. Customers are advised to view all products and samples at their fireplace retailer.
- The flame, ember bed and log picture to any eferno appliance will always be more vibrant in a darker room the same as any real wood burning fire.
- It is strongly recommended that your selected retailer surveys your intended installation site and all relevant items before purchasing any of our products.
- All of our Fireplace products must be installed by a suitably qualified, competent, and experienced installer complying with all relevant and current Building Regulations, any Rules in Force, and the manufacturer's instructions.
- Any description used to any product or within this brochure is in the view of the editor only and must not be used as a factual statement.
- All dimensions are in millimetres and are approximate.
- Any ancillary item shown in this brochure including ornaments and furnishing etc are not available and is not part of any electrical appliance or fireplace sale.
- We supply only to a selected network of fireplace and electric fire retail specialists within the UK. This has the advantage of viewing some of our products usually within close proximity to where you live. Also, the dealer can offer professional advice and surveys for your chosen product giving you total piece of mind, a very important part of any electric fire and fireplace purchase.
- Newman Fireplaces Ltd always strive for continued improvement, therefore, designs and products are occasionally altered or discontinued without prior notice (a reserved right). It is advised that you contact your fireplace / electric fire retailer for advice on any known changes before commencing, planning, or carrying out any associated works for your intended purchase.
- It is advised that when any natural stone fireplace has fully dried after installation, that all surfaces are sealed with a suitable stone sealer. Ask your fireplace dealer for advice.

*The running cost quoted within this brochure are calculated using the value of 27.93p/kwh, this is the current rate set by most energy suppliers at the time this brochure went to print, (please check your energy bill to confirm), however this is subject to change by the Energy companies at any time with or without prior notice, if using a slot meter supply or anything other than a standard billed meter reading the running costs will be significantly different to those quoted depending on the tariff you have been given, we suggest that you check this tariff before purchasing any eferno appliance. The running cost has been calculated with the flame and effect functions switched on excluding the fan heater and any optional extra mood lighting to each appliance.
