The Alchemy Range of Gas Fires

At the heart of every fireplace is the fire itself, but in today's busy world many people simply don't have the time to build and tend a real fire. A Chesney's Alchemy gas coal or log effect fire can provide the answer, offering immediate enjoyment of the beauty and warmth of a real fire at the flick of a switch.

Efficiency

In an era of soaring energy prices Chesney's is committed to developing products that deliver the highest levels of efficiency with the minimum running costs.

Our open fronted gas effect fires are an attractive and realistic recreation of a real fire rather than a primary heat source but our glass fronted fires deliver outstanding performance, achieving levels of up to 80% efficiency in independent testing. This allows an expensive energy source to be harnessed and utilised in a highly economical manner.

Functionality

Chesney's is engaged in a year round research and development programme at our in-house facility in Yorkshire. Our engineers work with our designers to combine the latest technology with a design aesthetic that results in products that are unique in their marriage of functionality and appearance.

Whilst high tech features such as thermostatic room temperature control and remote adjustment of flame height and heat output are available, no compromise is made in relation to the beautiful appearance of the fire.

Realism

Our aim is to create a range of fires that look as much as possible like the real thing.

Following endless experiments we have created flame patterns that are both generous and realistic, emulating the flame patterns of a real fire with individually hand painted logs that produce a deep life-like glow.

Whether in a traditional fire basket or behind glass, an Alchemy fire is almost indistinguishable from a natural fire.

Safety

With any gas appliance, safety is of paramount importance.

The Alchemy range has been tested and certified by the UK's leading independent test laboratory and our rigorous quality control systems ensure that all our appliances conform to British Safety Standards.

GFP 700 with block limestone effect interior panels, Faulkner fire dogs, Swansnest fire basket and Faulkner fireplace in limestone.

Installed with a recessed fire chamber floor.

Alchemy Glass Fronted Gas Fire Range

Placing a gas effect fire behind glass and within a sealed steel chamber exponentially increases its efficiency but can detract significantly from the appearance of the fire.

Uniquely, the Chesney's collection of glass fronted gas fires, the Alchemy GF range, succeeds in delivering outstanding levels of efficiency with no compromise in its ambitious and innovative design aesthetic. These fires not only look wonderful but they also work as highly effective and sophisticated convector heating appliances, achieving efficiency ratings of up to 80%.

Manufactured in the UK by a highly skilled work force using state of the art technology, the Alchemy GF range embodies precision engineering and intelligent design. Only the best materials and components are used with both inner chamber and outer casing fabricated from heavy gauge heat resistant steel to ensure optimum heat emissions and a long life for the appliance. Chesney's confidence in the reliability and performance of the product is reflected in the 5 year guarantee[†] that is given for all non-consumable parts.

Outstanding engineering and performance are only half the story. Every Chesney's product also has to satisfy the most challenging aesthetic design criteria. It must be innovative, original and beautiful. The Alchemy GF range meets these criteria. Every model in the range uses premium non-reflective "invisible" glass. This feature underpins the unique appeal of the range appearing to bring the fire right into the room.

The traditional range offers fire baskets and fire dogs as an option and a range of stone effect interior panels including block limestone, plain limestone and rustic Cotswold stone.

The contemporary range includes a polished bronze fire urn and mirror finish black glass panels amongst its unique features.

Detail from GFP 700 with rustic stone effect interior panels.

[†]The appliance is required to be annually serviced in order to maintain the 5 year manufacturer's warranty.

The Alchemy GFP 500

With its portrait sized proportions the Alchemy GFP 500 is ideally suited as the interior to a fire surround.

It is shown here with contemporary limestone effect panels and log fire inside the Devonshire limestone surround with matching hearth and slips. All models in the Alchemy GF range are available with a choice of interior panels.

The Alchemy GFP 500

The Alchemy GFP 500 is shown here inside the Classic Victorian limestone surround with a black slate hearth and slips and black interior panels accentuating the generous flame patterns.

Alchemy GFP 500

The Alchemy GFP 700

The Alchemy GFP 700 is shown with contemporary block limestone effect panels, brushed nickel plated Spherical fire dogs and Swansnest fire basket. It is framed by limestone slips and sits within the limestone Burlington surround on a matching limestone hearth.

The Alchemy GFP 700

The Limoges, a large French stone chimneypiece, combines perfectly with the Alchemy GFP 700, shown here with rustic stone effect panels and log fire.

Alchemy GFP 700

The Alchemy GFL 700

With its landscape proportions the Alchemy GFL 700 is a mesmerising addition to a room where a traditional fire surround is not required.

The GFL range comes with a choice of decorative frames which are manufactured in one piece giving a smooth quality finish. Shown here with a standard black frame and black reeded interior panels.

The Alchemy GFL 850

The large Alchemy GFL 850 is shown with a black frame, bronze Olympic Fire Urn* and reflective black glass interior panels.

Alchemy GFL 850

Alchemy GF Range Frame & Interior Panel Guide

Our range of frame and interior panel options allows you the flexibility to select a colour and finish that will suit the decorative scheme in your home.

Alchemy DFE Gas Fire Range

Chesney's offer an extensive range of fire baskets, fire dogs and register grates. Whilst these can all be used for burning solid fuel, they are equally attractive when combined with a gas coal or log effect fire from Chesney's Alchemy DFE range of gas fires.

An Alchemy DFE gas fire is a robust piece of engineering with every fire undergoing a rigorous build and testing process. These fires incorporate both a flame failure device and an oxygen depletion sensor and can either be operated manually or with a remote control function. It is our aim to create a fire that looks as life-like as possible and the combination of realistic flame patterns, individually hand painted logs and deep glow mean that every Alchemy fire is uniquely captivating.

The majority of fire baskets and register grates in the Chesney's range have an Alchemy DFE coal or log fire to suit.

The Alchemy DFE Coal Fire

Chesney's has a unique collection of fire baskets and dogs which can all be used with its Alchemy DFE range of gas fires.

This collection ranges from the stunning modernity of contemporary polished steel fire dogs and baskets to the hand engraved beauty of 18th century neo-classical fire baskets and an artisan crafted range of forged steel baskets and andirons.

The Alchemy DFE coal fire is shown with the Soho fire basket, Spherical fire dogs, Modern steel slips and limestone Burlington fire surround.

The Alchemy DFE Log Fire

Each log in a Chesney's Alchemy DFE log fire is individually hand painted. This attention to detail results in a fire of extraordinarily realistic and attractive appearance.

The Alchemy DFE log fire is shown with the Morris fire basket and Burton andirons inside the Limoges fire surround.

4 TELFORD

Width 9 1/2" (240)
Depth 24 1/4" (617)
Height 17" (432)

Flue Soundness & Requirements

Before the fire is installed, the chimney should be swept and a flue test in accordance with National Regulations should be carried out.

Flues for DFE gas fires must comply with BS5871-3/BS5440-1 to be used unlined.

The flue must be fitted in accordance with National Regulations, damper plates or flue restrictors must be removed or fixed permanently in the fully open position.

Builders opening and fire chamber must be constructed of non-combustible material. The minimum flue diameter is 178mm (7") diameter, 250 sq. cm. (38.5 sq. inches). An in-line fan that complies with BS5440: Part 1 can be used to improve flue draught.

NOTE - The flue must not be shared with any other appliance.

This appliance must not be fitted in any room where steam is present (e.g Bathroom/swimming pool).

It is advised not to stand too close to the appliance for prolonged periods of time; loose clothing is particularly at risk of burning due to the presence of an unguarded flame. It is also advised against placing combustible materials directly in front of the appliance. Floor coverings such as carpets, are considered to be acceptable.

Due to the newness of materials, the fire may give off a slight smell for a period of time after commissioning. This is quite normal and any odours should dissipate within a few hours of operation.

Ventilation

Ensure the room where the appliance is to be fitted has suitable ventilation. The size and type of ventilation should take into account any other gas appliance in the room. The room where the appliance is to be fitted must have a permanent air vent to the outside air in accordance with Local and National Regulations. The air vent must be checked on a regular basis to ensure there is no obstruction.

Fitting the Fire Unit

An isolation valve or valves must be fitted adjacent to the appliance in accordance with National Regulations. This is to allow the complete removal of the burner control assembly, for maintenance or repair.

Tempering of Steel Baskets & Register Grates

Polishing with WD-40 and fine wire wool is highly recommended on a periodic basis. The areas of the basket or register grate near the burning area are subject to 'tempering' which is discolouration of the metal, this is normal and not a problem.

Notes

A number of the Alchemy gas fires in this brochure have been installed with hand carved chimneypieces from Chesney's range of period and contemporary stone and marble fire surrounds. This is widely acknowledged as the leading collection of its kind in the world, and also includes a wide selection of fire baskets, fire dogs, andirons, fire tools and register grates. Separate full colour brochures are available illustrating these ranges.
