

SPARTHERM[®]
The Fire Company

PremiumEdition

"Dreams that accompany all people should be taken care of by the rooms that we live in."

Charles Moore

Fire symbolises the beginning of culture. Its form is pure magic - watching flames dancing in every moment of fascinating elemental force. These days a fireplace in our house can make a home. A fire in the living room brings cosiness and warmth.

It's wonderful when a fire can burn fiercely yet contain itself with great restraint. It can make an impressive design statement and maintain a puristic look. It makes for the perfect relaxed ambiance. That is the relaxing experience.

Welcome to the premium world of Spartherm.

Radiant soloists in an architectural ensemble.

With our innovative chimney inserts, you can fulfil your dream of pleasant living with a lively fire. Enjoy the attractive design and technical superiority of our premium fireplace inserts in your home every day. Cosy warmth, pleasant atmosphere and the feeling of luxury convert your living room into a wellness oasis for all senses. In this way you do not only increase your well-being, you also increase the value of your property.

Fire and flame for design and quality

Those wanting to satisfy the highest expectations do not make any compromises. Driven by the desire for perfection, we have been developing and producing fireplace inserts for exceptional chimney architecture for 30 years. Why are our fires so special? It's simple: they are conceived with passion, designed and manufactured with the best craftsmanship and the highest attention is given to the finest detail.

The reward for our our focus on design perfection: renown, prizes and awards, such as the "Plus X Award 2015", "Iconic Award 2015", "Plus X Award – Best Design Brand 2015/16", "German Design Award Special 2016"

Find inspiration in the outstanding design of our fireplace inserts and enjoy the quality time spent at home with our fireplaces.

„Excellent design, the spirit for detail and well considered customer benefits are encompassed in each of our fire-place inserts.“

*Gerhard Manfred Rokossa
Founder and executive company
member Spartherm*

Puristic design from unprecedented elegance

"The shape is not the goal, it is the result"

Ludwig Mies van der Rohe

Enjoy the beauty of fire

With its generous viewing window, the V-ASh positions itself in the background on purpose and leaves the stage to the fire. The unique flush mounted look offers a fascinating panoramic view of the fire that nobody can take away from you. Other special features of our V-ASh models: the fireplace insert is equipped with double glazing for pleasant reduced-heat radiation into the room where it is installed. On request, you can also control the sliding mechanism conveniently using a remote control.

Well-being of the aesthetic type

"Shape and function should be united, joined in a spiritual unit."

Frank Lloyd Wright

Reassuring counterbalance for the daily hustle and bustle

With an unrestricted view of the fire and a low installation depth, the fireplace insert V-2L/2R-55 GET sets has a demanding emphasis. This is a fireplace that is characterised by its lean structural shape and limited space requirement. Ideal in all room situations where conventional chimneys are too invasive. Or where the wall material has not allowed the installation of a chimney until now. Sophisticated technology allows the direct assembly, even in front of combustible wall materials.

Shiny eyes for fireplace enthusiasts

"He who understands geometry, understands anything in the world."

Galileo Galilei

The centre of sensuality

The most attractive alternative to flat-screen televisions. With its impressive glass size, the V-M-80h sets clear accentuations in any interior. And from the first instance 80h brightens any interior, spreads an attitude towards life that one never wants to miss. From when the first log starts to burn, it spreads a feeling of wellbeing you'll never want to miss. Having a shallow installation depth, it is particularly suitable for compact room situations.

The impressive eye-catcher in stylish ambience

"The details are not the details. They make the design."

Charles Eames

Harmony and quality for the discerning epicures

Innovative technologies, ecological approach, outstanding functionality, extraordinary design and a simple operating concept characterise the model A-3RL-60h. The complex glass design gives a full view of the magnificent interplay of flames from three sides. This makes our premium model A-3RL-60h a real highlight that will generate well-being over decades.

Experience what is essential: Design. Quality. Function. Craftsmanship.

Our fireplace inserts are the heart of appealing chimney aesthetics. A particular key feature of the premium chimney is its minimalist design which places its emphasis on the essence of a fireplace: the fire. For us, the main experience is in the flames, not the function.

Quality

Made in Germany, made by Spartherm. The best materials, high-quality crafting and a premium concept guarantee the highest functionality and service life.

Functionality

The best example of high functionality and appealing attention to detail in design: the ventilation adjustment lever for the optimum regulation of the fire. Reduced to the bare essentials, it is integrated into the unit inconspicuously.

Design

Premium fireplace inserts from Spartherm are characterised by high-quality, edgeless looks, with the highest aesthetic demand for incomparable perspectives and a direct view of the flames. Designs that can be integrated into any architecture, they open completely new options and have been distinguished with several prizes for exceptional design.

Hand-crafted

Many work steps are required to manufacture an outstanding fireplace insert. A lot of manual work, experience and our uncompromising attitude that demands perfection are what ensure excellent Spartherm quality.

The fire signs of our time: Innovation. Clarity. Efficiency.

A Spartherm fire makes a spectacular impact in any atmosphere, and with any interior - and offers you a multitude of benefits.

A worlds first

Edgeless, frameless, flush-mounted - a world first. It is the technical innovations in regard to safety architecture that allow Germany's market leader Spartherm to design a chimney with an impressive art of fire.

Clear view

Constructed in one cast, one-piece glass panes made from rigid glass ceramic give you an unlimited view of the flames. For added value, cleaning the glass ceramic pane is child's play: simply push it up completely or lower to the ground.

Double glazing

The elaborately constructed double glazing of the premium fireplace insert V-ASh ensures a perfect view of the fire and at the same time guarantees optimum insulation. And the fact that the safety glass is also easy to clean gets you even more pleasure from your fire, day after day.

Efficiency

High efficiency rating thanks to advanced technology - the award winning Spartherm fireplace inserts ensure a particular operation and optimum utilisation of energy. As a whole, the premium fireplace inserts from Spartherm have been designed for sustainable use that protects the environment and your wallet.

A variety of choice to satisfy your good taste

Technical data Premium V-ASh

Dimensions (H x W x D):	1.296 x 955 x 502 mm
Dimensions, concrete frame (H x W x D):	892 x 1,233 x 122
Cast iron dome flue gas connection:	Ø 180 mm
Combustion air connection:	SVS connection Ø 150 mm
Overall weight:	212 kg
Internal finish:	chamotte white or black
Door height:	338 mm
Clear window size (W x H):	847 x 338 mm
Wood feed quantity:	2.1 kg/h
Nominal heat output:	7.1 kW
Thermal output range::	4.9 - 9.1 kW
Flue gas temperature at the connecting socket:	275°C
Mass flow of flue gas:	7.0 g/s
Efficiency:	> 80 %
Min. supply pressure:	12 Pa
CO emission:	< 1,250 mg/Nm ³
Dust content::	< 40 mg/Nm ³
Requirements:	DIN 13229, DIN plus, 15a, 1st and 2nd level of the German Federal Pollution Control Ordinance (BImSchV).

For the passion of detail

Using perfectly matched accessories, you can have exactly the fire you want. We can offer you many different system extensions for our premium fireplace inserts that guarantee even more enjoyment from the fire and warmth. These include electronic regulating modules that increase efficiency significantly, permit a sustainable burnup ecology and offer you additional comfort.

Using the matching accessories, with the assistance of your trade partner, you can create an individual overall piece of art from your Spartherm fire.

You can obtain more information about our comprehensive range of accessories at

www.spartherm.com / www.drufire.co.uk
or from our qualified trade partners.

Fire with remote control

Enjoy premium comfort, also when operating our award-winning fires. With the „Cool Touch“ handle, all controllers on the fire can be set during operation - the optimum thermal protection for your hands. The pane mechanism can also be operated using the „Cool Touch“ handle, or conveniently using our especially constructed remote control.

Excellence from one source

As a market leader in the sector for premium fireplace inserts, our attention is not only placed in the convincing technology and outstanding design. When choosing our trading partners we look for the highest standard of consultation quality, perfect installations, and an instinctive attention to detail. To ensure your Spartherm fireplace insert becomes an exclusive installation, we only work together with partners that satisfy our highest quality demands and offer you a perfect service from one source. Our partners would be pleased to accompany you at every stage, from consultation to planning through to the end assembly, and naturally, also take over all meetings with the responsible local building regulation authority. To allow you to enjoy more well-being right from the beginning.
