

The Complete Collection | January 2019

Quality reigns supreme

One of Britain’s much-loved brands...From humble beginnings in 1890, Valor has grown to become one of Britain’s much-loved brands and today, we are one of the most recognised names in home heating. A reputation built on reliability, trust and safety stems from our unswerving commitment to create energy efficient heating solutions that surpass the needs of today’s modern lifestyles.

Our advances in gas fire technology are legendary...Dedication and commitment, combined with pioneering technology, is the reason we’ve always been steps ahead of the competition. Not only did we revolutionise the market with the first ever living flame gas fire and the first ever balanced flue fire, the Valor Dream still ranks as the best-selling inset gas fire EVER!

One of the largest portfolios of fires and stoves...In recognition of our endeavours to reduce carbon emissions and running costs through ground-breaking gas fire technology, we received the prestigious Queen’s Award for Enterprise: Innovation in 2009 for our best-selling Homeflame gas fire range. With this heritage it’s no wonder we have one of the largest portfolios of fires and stoves available in the UK today.

Fires and fires galore...Meticulously designed to suit the many different requirements of UK homes and chimney configurations, our latest collection of fires boasts a range of installation options and designs styles to suit every need, pocket and lifestyle. Take our gas collection. Featuring a wide variety of living flame effect fires in a range of different styles, colours and options - including fuel beds, control types and installations – these models are available in high efficiency, decorative, inset, balanced flue, outset and radiant options - to name but a few.

Meanwhile, when it comes to electric, it’s easy to see why Valor is a number one choice. 100% efficient at the point of use, which means no heat is wasted, these high efficiency LED electric fires benefit both the environment and help reduce energy bills. Our premier range of Dimension fires also provide an unrivalled degree of realism.

Trust us, we have it covered...As one would expect from a leading manufacturer, all Valor gas and electric fires are quality tested to rigorous standards and in the case of gas fires, this even includes a gas soundness test. All our gas fires come complete with a flame safety device that cuts off the gas in the unlikely event that the pilot light becomes extinguished and an equivalent is also featured across all our electric models.

When you purchase a Valor or Robinson Willey fire, you do so with the utmost confidence that it will serve you for many years to come. With our products there can be no mistaking - quality reigns supreme.

A simple guide

for choosing the correct fire for your home

With the many advancements in fire technology it is easy to get confused. We have laid out the Valor range options in an easy to view matrix, so you can compare the product offers and pick the one perfect for you and your home.

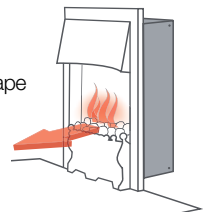

Generally fires are powered by mains gas, LPG, electricity or solid fuel, the options for selecting a fire may start here. If like many homes in the UK you have access to gas, electricity and solid fuel, your next consideration is likely to be the availability of a chimney or flue.

What type of chimney does your home have?

Look at the pictures and decide which one best matches the chimney at your home then, when you're reading through our brochure and find a fire you like, simply check in the features section of the page under 'Chimney Required', to see if it's suitable for the chimney at your property.

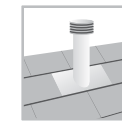

No Chimney (NC)

Even if you have no chimney or flue we have a selection of fires for you. Our balanced flue and electric fires are the solution here.

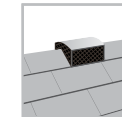

Brick Chimney (BC)

Suitable for all fires. The classic brick built chimney can handle fires with a deep fuel bed right through to shallower slimline styles.

Pre-fabricated Flue (PF)

Suitable for most fires, dependent on the flue depth and diameter

Pre-cast Flue (PCF)

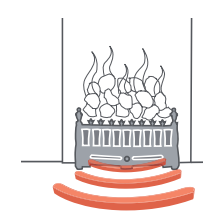

Suitable for a wide range of slimline, outset & radiant gas fires

Decorative Gas Fire

High Efficiency

Valor's dedicated research and development facility combines the latest technology with innovative techniques to ensure our products offer the highest possible efficiency. This not only helps consumers meet energy targets, but also keeps running costs to a minimum.

Gas

Gas fires are a great way to help to reduce the overall fuel usage in the home. They offer an effective way of heating the space you are living in which allows the central heating to be turned down or even off. Gas fires deliver heat in two modes, radiant and convection. They do not need electricity so you have a secure option for heat in power outages or boiler breakdowns. Our Homeflame range of gas fires are amongst some of the most efficient gas fires available and will help you save on running costs while our balanced flue and radiant gas fires also offer impressive efficiencies.

Electric

All electric fires are 100% efficient at point of use, which means for every kW of energy used you get the same kW heat output from the fire.

Pick the perfect fire for your home

Dream Slimline Convector Inset Gas Fire

Seattle Slimline Inset Gas Fire

Black

Majestic Decorative

The Majestic is a stylish Decorative gas fire (DGF) that provides almost endless interior design options - a coal fuel bed with black fire front. DGFs can be used in large chimney openings to create a realistic open fire look as unlike inset fires, they consist of just the fire basket, without the “box” unit surrounding it, giving all the charm and appeal of a real fire without the hassle.

Features:

- Max Heat Input:** 6.85kW
- Gas Type:** NG & LPG
- Control Type:** Manual Control
- Dimensions:** (HxWxD) n/a x 380 x 193mm
- Chimney Required:** BC, PF

Activeheat™

Fires with Activeheat™ give out radiant heat but also draw in cold air from the room, pass it through a heat exchanger to warm it up and then circulate it back around the room. The result is that the room is heated much faster than by radiant heat alone.

HeatXchanger

When you are buying a fire for performance you will not be able to beat our range of gas fires that include a secondary steel heat exchanger. All these fires come with a dedicated heat exchanger which means that the amount of convected heat is unsurpassed by any other fire of its kind. The flue gases are directed from the firebox into the heat exchanger and after scrubbing as much useful heat as it can the products of combustion are safely released into the flue.

Valor Centre 3 Year Guarantee

When you purchase a Valor or Robinson Willey fire, you do so with the utmost confidence that it will serve you for many years to come. Such is the confidence in our products and in our exclusive stockists, that we are able to offer an exclusive THREE-YEAR guarantee when your fire is purchased from one of our network of Valor Centres - providing the fire is serviced annually in accordance with Valor/Robinson Willey guidelines. This gives you an additional two-year's peace of mind over and above our standard guarantee, and you can relax in the knowledge that your fire has been recommended, supplied and installed by professionals and to the highest standards.

To find your nearest Valor Centre, please visit www.valor.co.uk

Trueflame Mix & Match Options

The ‘mix and match’ range of inset gas fires provides increased flexibility when it comes to choosing a gas fire. Important notice: All dimensions stated within the specification table are intended as guidance only. Please consult installation instructions before commencing any building work. The right to change specification without prior notice is reserved. No liability is accepted for problems caused by poor installation or misuse of product.

* Engine Depth

Key to Technical Table

Hearth & WM Can be hearth or wall mounted - ashpan is not separate

Hearth Can be hearth or wall mounted. If wall mounted the fire would require a small plinth to support the fret/ashpan which is not attached to the main fire.
NB: Please note that the fires which are highlighted as ‘Hearth’ are intended for floor level installation with a back panel and hearth. If raised some of the inner workings of the fire may become more visible than intended.

† These fires are suitable for most pre-fabricated flues dependent on the flue depth and diameter. Please refer to the installation instructions to ensure that this fire is compatible.

> Inset balanced flue fires can be installed inset/semi-inset into the wall cavity with the 3” spacer, or flat against the wall with the 5” spacer.

Note: Due to the sheer number of varying flue boxes and pre-cast flues it is not possible to advise on which fires are suitable until the existing fire has been removed. If the width at the rear of the pre-cast flue starter blocks is less than 300mm wide the minimum depth of the opening will be not less than 154mm.

Key to Logos

Intertek

All our electric fires are BEAB approved. The mark of the British Electrotechnical Approvals Board signifies that the appliance bearing it has been produced to the stringent safety requirements for domestic electrical appliance as laid down in BSEN60335

All our products carry the CE Mark complying with European Safety Standards

Our products are made in accordance with Quality Management System Standard ISO 9001.

WEEE Producer Registration Number WEE/GE0057TS
WEEE Distributor Take Back Scheme - Registration ID: 6131

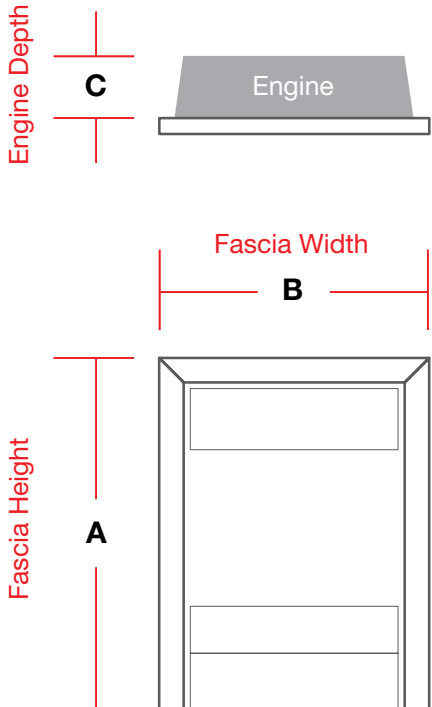

Terms & Conditions

Valor's policy is one of continual improvement and development. The right to change specification without prior notice is reserved, therefore the actual product may change and so the image shown may not be an exact representation. All images within the brochure were correct at time of print. Reproduction of colours is as accurate as photographic processes will allow.

Though accurate at the time of printing, this brochure is not intended to replace the installation manual which provides more detailed information. The statutory rights of the consumer are not affected.

*No liability is accepted for problems caused by poor installation or misuse of the product.
