

The Electric
**Fireplace
Collection**

by **oer**

Welcome to our latest innovative and exciting range of electric fireplaces and media units.

OER (Olde England Reproductions) have been designing and manufacturing fireplaces for over 30 years and have over 18 years of awards for their designs and service. This range of fireplaces has been designed to incorporate the latest technology in electric fires.

We are proud to use the finest materials within these designs — natural oak (sustainably sourced), natural real slate veneers and porcelain.

Our painted components have a durable satin finish and any of our designs can be made to measure in a wide choice of colours and materials — your fireplace is hand-made to your order.

We believe we have created a range of desirable fireplaces to suit all types of homes that incorporate the following unique advantages:

- No structural installation
- Flat wall fix – no chimney or flue required
- Minimal or no assembly
- Complete bespoke service, choose your colour and size
- LED electric fires with additional options
