ECO2022

COMPLIANT STOVES

DEFRA, the Department of the Environment, Fisheries and Rural Affairs, included wood burning stoves in their 2019 Clean Air Strategy. Their aim by doing this is to reduce the amount of harmful emissions that affect air quality by ensuring stove manufacturers improve the performance and efficiency of their stoves.

By January 2022 it will be law that all solid fuel appliances sold after that date have to be Eco Design Compliant. To be Eco Design Compliant, stoves will need to significantly improve emissions when compared to current stoves on the market or to open fires.

Capital Stoves displaying the **Eco 2022** logo shown in this brochure, have been tested in an independent approved test house and have achieved the requirements of Eco Design Regulations. Registration has also been made with **HETAS** (Hetas is a national organisation working for consumer safety and the wider public interest in safe, efficient and environmentally responsible use of biomass and other solid fuels) and **DEFRA**.

A requirement of Eco Design Regulations is that all gas and multi fuel appliances display an energy rating. All Capital Eco 2022 Ready Stoves have A or A+ ratings.

At Capital we launched our first range of fully compliant Eco 2022 Ready Stoves in 2018. We were proud to do this knowing we were one of the first companies to have stoves that were already achieving the necessary

standards. Look out for the **Eco 2022 logo**, complemented by the **HETAS** and **DEFRA** registrations as shown below and throughout the brochure. These stoves not only reduce the level of harmful air pollutants but they also run more efficiently using less fuel, so will cost less to operate.

Improving our carbon footprint is a key part of our business philosophy. Vital to that strategy is our continued work on Eco 2022 Ready Stoves and our partnership with the National Forest.

THE NATIONAL FOREST

MAKE YOUR MARK. PLANT A TREE.

We are excited to have teamed up with the National Forest, one of Britain's biggest environmental projects, covering 200 square miles of Leicestershire, Derbyshire, and Staffordshire.

For every Capital Eco Stove that is purchased, you are helping to grow the National Forest and create woodland habitats that will benefit people and wildlife for years to come. Simply look out for the National Forest logo throughout this brochure.

In 27 years, the National Forest has grown the region's woodland cover from 6% to 21%. By supporting this initiative, you're helping us to make habitats for wildlife and grow a healthier, happier Britain. For more information about the National Forest please visit www.nationalforest.org

new
for 2021

Woodrow 4 Eco Wood Only

The Woodrow 4 Eco is one of the latest and most exciting additions to our Eco 2022 stove range, a compact wood only log burner designed for smaller rooms or narrow chimney openings. Constructed from steel and cast iron for durability and maximum

heat, this stove features an airwash system for maintaining an optimal view of the flames and is supported by the Capital Lifetime Warranty.

Nominal Heat Output & Range:	4kW
Efficiency:	Up to 76.4%
Flue Exit:	Top
Flue Size:	125mm
Ventilation:	Not normally required (see page 66)
Suitable for a Light Duty Hearth:	No

Clearance to combustibles is 600mm, clearance to non-combustibles is 50mm. Please refer to the installation instructions for more info.

Woodrow 5 Eco Wood Only

Slightly larger than the Woodrow 4 Eco stove and therefore offering a bigger glass picture window, the Woodrow 5 Eco is another exciting addition to our Eco 2022 stove range. Constructed from steel and cast iron for durability and maximum heat, this stove features an airwash system for maintaining an optimal view of the flames and is supported by the Capital Lifetime Warranty.

Nominal Heat Output & Range:	5kW
Efficiency:	Up to 82.6%
Flue Exit:	Top or Rear
Flue Size:	125mm
Ventilation:	Not normally required (see page 66)
Suitable for a Light Duty Hearth:	No

Clearance to combustibles is 600mm, clearance to non-combustibles is 50mm.
Please refer to the installation instructions for more info.

Verena Eco

The Verena Eco stove is sleek, compact and highly efficient. With a curved body and matching glass, you're assured an excellent view of the flickering flames, whilst it is supported by the Capital Lifetime Warranty for complete peace of mind.

The Verena is DEFRA approved for burning wood in a smoke control area, boasting maximum performance and a contemporary look – giving you the power to completely transform a room!

Nominal Heat Output & Range:	4.9kW
Efficiency:	Up to 75.4%
Flue Exit:	Top or Rear
Flue Size:	125mm
Ventilation:	Not normally required (see page 66)
Suitable for a Light Duty Hearth:	Only with Supreme Legs

See page 37 for Prime and Supreme Leg dimensions. Clearance to combustibles to the top is 400mm and 300mm to the sides, clearance to non-combustibles is 50mm. Please refer to the installation instructions for more info.

The Avebury Eco is a highly efficient, multi fuel stove from our Eco 2022 stove range. DEFRA approved for burning wood in a smoke control area, the Avebury is constructed from cast iron for durability and maximum heat.

Featuring a large, arched glass picture window and airwash system for maintaining an optimal view of the flames, the Avebury is supported by the Capital Lifetime Warranty and is suitable to be fitted on a light duty hearth as pictured here with a 20mm polished granite hearth and rear flue exit.

Nominal Heat Output & Range: 5kW (2.5-8kW)

Efficiency: Up to 84%

Flue Exit: Top or Rear

Flue Size: 125mm

Ventilation: Not normally required (see page 66)

Suitable for a Light Duty Hearth: Yes

Clearance to combustibles is 600mm, clearance to non-combustibles is 50mm. Please refer to the installation instructions for more info.

Bassington Eco

The Bassington Eco is a highly efficient, multi fuel stove from our Eco 2022 stove range. DEFRA approved, the Bassington is constructed from cast iron for durability and maximum heat and is supported by the Capital Lifetime Warranty. Featuring a large glass picture window and airwash system, the Bassington is shown here with the Appledore 54" Aegean Limestone mantel and Riven Slate chamber.

Nominal Heat Output & Range:	5kW (2.5-8kW)
Efficiency:	Up to 84%
Flue Exit:	Top or Rear
Flue Size:	125mm
Ventilation:	Not normally required (see page 66)
Suitable for a Light Duty Hearth:	Yes

Clearance to combustibles is 600mm, clearance to non-combustibles is 50mm. Please refer to the installation instructions for more info.

The Bassington Eco is a highly efficient, multi fuel stove from our Eco 2022 stove range. DEFRA approved for burning wood in a smoke control area, the Bassington is constructed from enamelled cast iron for durability and maximum heat.

Featuring a large glass picture window and airwash system for maintaining an optimal view of the flames, the Bassington is suitable to be fitted on a light duty hearth and can also be supplied in Black as pictured on page 16.

Nominal Heat Output & Range: 5kW (2.5-8kW)

Efficiency: Up to 84%

Flue Exit: Top or Rear

Flue Size: 125mm

Ventilation: Not normally required (see page 66)

Suitable for a Light Duty Hearth: Yes

Clearance to combustibles is 600mm, clearance to non-combustibles is 50mm. Please refer to the installation instructions for more info.

A⁺

Bassington Eco Skirted

The Bassington Eco is a highly efficient, multi fuel stove from our Eco 2022 stove range. DEFRA approved for burning wood in a smoke control area, the Bassington is constructed from cast iron for durability and maximum heat.

Featuring a large glass picture window and airwash system for maintaining an optimal view of the flames, the Bassington is supported by the Capital Lifetime Warranty and has been paired perfectly here with the Helston 53" Corinthian Stone mantel and Pompeii brick chamber.

Nominal Heat Output & Range: 5kW (2.5-8kW)

Efficiency: Up to 84%

Flue Exit: Top or Rear

Flue Size: 125mm

Ventilation: Not normally required (see page 66)

Suitable for a Light Duty Hearth: Yes

Clearance to combustibles is 600mm, clearance to non-combustibles is 50mm. Please refer to the installation instructions for more info.

A⁺

The Bassington Eco is a highly efficient, multi fuel stove from our Eco 2022 stove range. DEFRA approved for burning wood in a smoke control area, the Bassington is constructed from enamelled cast iron for durability and maximum heat.

Featuring a large glass picture window and airwash system for maintaining an optimal view of the flames, the Bassington is suitable to be fitted on a light duty hearth and can also be supplied in Black as pictured on page 21.

Nominal Heat Output & Range: 5kW (2.5-8kW)

Efficiency: Up to 84%

Flue Exit: Top or Rear

Flue Size: 125mm

Ventilation: Not normally required (see page 66)

Suitable for a Light Duty Hearth: Yes

Bassington Eco Baseline

The Bassington Eco is a highly efficient, multi fuel stove from our Eco 2022 stove range. DEFRA approved, the Bassington is constructed from cast iron for durability and maximum heat and is supported by the Capital Lifetime Warranty. Featuring a large glass picture window and airwash system, the Bassington Eco Baseline is pictured here inside a black reeded chamber.

Nominal Heat Output & Range:	5kW (2.5-8kW)
Efficiency:	Up to 84%
Flue Exit:	Top or Rear
Flue Size:	125mm
Ventilation:	Not normally required (see page 66)
Suitable for a Light Duty Hearth:	No

Clearance to combustibles is 600mm, clearance to non-combustibles is 50mm. Please refer to the installation instructions for more info.

Bassington Eco Baseline

The Bassington Eco is a highly efficient, multi fuel stove from our Eco 2022 stove range. DEFRA approved, the Bassington Eco Baseline is constructed from enamelled cast iron for durability and maximum heat and also features a large glass picture window and airwash system. Pictured here in Warm White Enamel with the Astwick 54" mantel in Corinthian Stone with a matching stone chamber and slabbed hearth.

Nominal Heat Output & Range: 5kW (2.5-8kW)

Efficiency: Up to 84%

Flue Exit: Top or Rear

Flue Size: 125mm

Ventilation: Not normally required (see page 66)

Suitable for a Light Duty Hearth: No

Clearance to combustibles is 600mm, clearance to non-combustibles is 50mm. Please refer to the installation instructions for more info.

Scene Eco

The Scene Eco is a highly efficient, multi fuel stove from our Eco 2022 stove range. DEFRA approved, the Scene Eco is constructed from cast iron for durability and maximum heat. Featuring a large glass picture window and airwash system, this stove is also supported by the Capital Lifetime Warranty. Pictured here inside the Rusty Slate chamber.

Nominal Heat Output & Range: 5kW (2.5-8kW)

Efficiency: Up to 84%

Flue Exit: Top or Rear

Flue Size: 125mm

Ventilation: Not normally required (see page 66)

Suitable for a Light Duty Hearth: Yes

Clearance to combustibles is 600mm, clearance to non-combustibles is 50mm. Please refer to the installation instructions for more info.

Sigma Eco

The Sigma Eco is a highly efficient, multi fuel stove from our Eco 2022 stove range. DEFRA approved, the Sigma Eco is supported by the Capital Lifetime Warranty and is constructed from cast iron for durability and maximum heat. Featuring a large, arched glass picture window and airwash system. The Sigma Eco is pictured to the left with the Geocast 48" Rustic beam in Natural Oak and Red brick chamber.

Nominal Heat Output & Range:	5kW (2.5-8kW)
Efficiency:	Up to 84%
Flue Exit:	Top or Rear
Flue Size:	125mm
Ventilation:	Not normally required (see page 66)
Suitable for a Light Duty Hearth:	Yes

Clearance to combustibles is 600mm, clearance to non-combustibles is 50mm. Please refer to the installation instructions for more info.

BEAM BRACKETS ALSO AVAILABLE

Vega Edge 200SL Eco

The Vega Edge 200SL Eco is a highly efficient, multi fuel stove from our Eco 2022 stove range. DEFRA approved, the Vega Eco is supported by the Capital Lifetime Warranty and is constructed from cast iron for durability and maximum heat. Featuring a large glass picture window and airwash system, the Vega Eco is shown here with the 48" Geocast Classic Antique Oak beam and Riven Slate chamber.

Nominal Heat Output & Range:	5kW (2.5-8kW)
Efficiency:	Up to 84%
Flue Exit:	Top or Rear

STOVE BEAMS

Geocast Classic Beam

Available in sizes 42", 48" & 54"

Our non-combustible oak effect classic beams have been developed from a natural and extremely durable material and are molded to achieve ultimate high definition creating a truly authentic look. Being non-combustible, our Geocast beams allow smaller clearance distances than natural wood.*

Ambient lighting can also be supplied on our 48" and 54" classic beams as an optional extra, that not only creates a warmer impression in your home, but also gives more focus to the fire. The lighting kit can be operated separately to the stove, meaning you're able to maintain a cosy ambience with or without the stove being lit.

Our new decorative beam brackets are a great addition to enhance the visual effect of the Geocast Classic beams. Please see page 57 for images.

The Geocast Classic beams are available in the following sizes and finishes;

42" - Light Oak, Dark Oak

48" - Light Oak, Dark Oak, Antique Oak

54" - Light Oak, Dark Oak, Antique Oak

Please note all of our beams are hand finished therefore may vary slightly. *See our website for clearances.

48" Antique Oak with Ambient Lights

DECORATIVE BEAM BRACKETS

Small beam
brackets available

54" Dark Oak (shown with large decorative beam brackets)

Dark Oak

Geocast Rustic Beam Natural & Dark Oak

Available in 48" & 54"

Our non-combustible oak effect beams have been developed from a natural and extremely durable material and are molded to achieve ultimate high definition creating a truly authentic look.

Being non-combustible, our Geocast beams allow smaller clearance distances than natural wood.*

Beautifully rustic yet sophisticated with a natural and dark oak finish, the Geocast Rustic Beam embraces a rural, country charm look and feel, perfect for the traditional home. Available in sizes 48" and 54".

*Please see our website for clearances.

lifetime
warranty

CAPITAL MULTIFUEL STOVE LIFETIME WARRANTY

All Capital multi fuel and wood burning stoves are covered by a Lifetime Warranty, unless otherwise stated, for added peace of mind (valid for original purchases only) from date of sale. This Warranty excludes the following naturally wearing consumable items; door glass, firebricks, rope seals, baffle and grate (including riddling mechanism).

This Warranty also excludes the “warm white enamel” finish on any of our stoves. Enamel finish products are inherently susceptible to crazing and chipping in the normal wear and tear of the product life.

In addition, the following criteria must be met:

- ✓ Sight of the data plate that should have been fitted by the approved installer.
- ✓ Proof of installation by HETAS or other approved body, or letter from Building Control confirming that the installation was installed in accordance with the Building Regulations.
- ✓ Proof of purchase from one of our approved suppliers.
- ✓ Proof of annual sweeping of chimney, at which time an inspection as to the condition of both the chimney and the stove should be carried out to allow for necessary maintenance to be performed.
- ✓ Only dry/seasoned wood with moisture content of less than 20% or Anthracite has been used.

Capital Fireplaces Ltd will accept no responsibility for installations which have been carried out that are not in accordance to the Building Regulations or if the conditions stated in the manufacturer's instructions are not adhered to. Warranty applies to parts only.

IMPORTANT POINTS

Always read user instructions prior to initially using the stove.

We recommend burning kiln dried wood, this will give you up to twice the heat output of freshly felled timber and helps reduce tar build up in the flue.

Do not overload the stove at any one time.

Never burn household rubbish as this can give off harmful gasses and will reduce the performance of the stove.

CAPITAL GAS STOVES WARRANTY

We offer a 1 Year Warranty for the Traditional Gas Stove and a 2 Year Warranty for the Bassington & Vega BF/CF Gas Stove. Subject to conditions, please see www.capitalfireplaces.co.uk for more details.

TECHNICAL INFORMATION

STOVE VENTILATION

Houses built before 2008: Houses built before 2008 are likely to have an air permeability greater than $5\text{m}^3/\text{h.m}^2$ so stoves with an output below 5kW do not require an air vent. However, stoves with outputs above 5kW require a permanently open vent. So for each kW of output above 5kW allow 550mm^2 of air supply. Extensive renovation of an older property carried out after 2008 may reduce the air permeability to less than 5m^3 , in which case the guidance for houses built after 2008 should be followed. Chimneys with flue stabilisers are subject to different ventilation requirements.

Houses built after 2008: Houses built after 2008 with an air permeability of less than $5\text{m}^3/\text{h.m}^2$ require the air supply to be calculated for the whole of the stove's rated output. This means that the installation of stoves with an output of less than 5kW must now have a permanently open air vent. Allow 550mm^2 of air supply for each kilowatt of rated output. Seek advice from your retailer and building regulator.

THE BURNING IN PERIOD

All Capital Stoves are manufactured from cast iron or steel therefore it is vital that appliances undergo a period of "burning in", this involves small fires initially, gradually increasing in size with each firing. When purchasing a stove, please remember to adhere to the following important points; always read user instructions prior to initially using the stove, burn only anthracite or kiln dried wood as this will give you up to twice the heat output and help reduce tar build up in the flue, never burn household waste and do not overload the stove at any one time.

CLEANBURN STOVES

To burn fuel in a smoke controlled area the law determines that either the fuel should be smokeless or the appliance should be approved by DEFRA (Department of the Environment, Fisheries and Rural Affairs) normally these appliances are approved by DEFRA for burning kiln dried wood. Some of our DEFRA approved products are capable of burning both kiln dried wood and anthracite in smoke control areas, a dual fuel use that most cleanburn products cannot offer.

All Capital Stoves are CE approved to EN13240.

Please note many of the flue pipes shown in this brochure have been sprayed with one of Capital Fireplaces high temperature paints to match the finish of the stove.

CHOOSING THE RIGHT FUEL

Please note choosing the right fuel for your stove or fireplace is vital to ensure a lifetime of enjoyable, trouble-free use. To burn fuel in a smoke controlled area, the law determines the fuel should be smokeless or the appliance should be approved by DEFRA. Therefore we would only recommend burning kiln dried wood or anthracite, any other fuel or objects such as household waste will produce harmful gasses subsequently reducing the performance of your appliance.

Misplaced your Capital Stove manual? No problem, digital copies can be found on our website at www.capitalfireplaces.co.uk/technical-information

Capital Fireplaces Ltd reserve the right to change specification or de-list products at any time. Due to the nature of the materials and appliances used within this brochure, actual finishes and colours may vary slightly. Flames shown may also vary depending on gas type, fuel quality and the performance of the flue or chimney, images in this brochure are for illustration purposes only.
