The Stove Collection

Welcome to Olde Englade Reproductions latest collection. Established in 1986, OER continues as a family run business located in Stoke-On-Trent.

Our new solid fuel catalogue features a wealth of fireplace products and materials suitable for all tastes, from traditional to contemporary styles, to compliment and enhance your home. All fireplace materials are hand picked, designed and bespoke manufactured by our time served craftspeople at our factory in Staffordshire. In this catalogue you will find multi-fuel stoves, gas stoves, tiled hearths, chambers, wooden beams and non-combustible beams. Our vast range of products provide a comprehensive choice to piece together your own OER fireplace design.

OER stoves provide a classic look to suit modern and traditional homes alike. Our multifuel stoves offer a small and large size for a typical inglenook installation, or can be purchased with an additional log store height, making them the perfect heating appliance for freestanding installations in rooms without a chimney. As a low maintenance appliance, OER gas stoves offer the desired look of a log burner, providing heat at the touch of a button.

We are sure you'll find a solution for your new fireplace in our catalogue, should you require any further information or a complimentary sample of your preferred material, please contact OER or your local approved OER stockist.

For your local stockist outside of Staffordshire please visit our website:

OER 5 LOG STORE

OER 8 LOG STORE

The OER 8 & OER 5 log store stoves provide additional height for taller inglenooks or freestanding stove installations. Offering a more contemporary solution for rooms without a chimney, the OER log store stoves can enhance any space such as extensions, orangeries, outbuildings or living spaces.

Log stores are available to purchase as an additional accessory on OER multifuel stoves - please discuss with your local retailer for more information.

FLAME-SAFE CAST BEAMS

Flame-Safe cast **non-combustible** beams are replicated from real wood and slate samples to offer a realistic and **safe choice**. Flame-safe cast beams can be fitted as close as 250mm from a solid fuel or gas stove, providing you complete peace of mind. An environmentally friendly alternative to wood beams, this realistic collection is now available in a choice of designs and colours.

CONCRETE

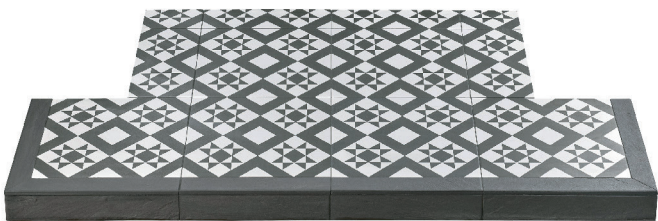

TILED HEARTH

OER's range of tiled chambers and hearths are **designed and manufactured in Stoke-on-Trent**. We offer a bespoke service on all tiled products and manufacture to your exact requirements. From our wealth of knowledge of 35 years in manufacturing, our tried and tested method has stayed the same, all hearths are slabbed in concrete and reinforced with iron bars to take the weight and heat of any stove, despite cheaper and quicker methods becoming available.

*Rectangular hearths available

TILED HEARTHTHS

Tiles are the most recommended material when picking a solid fuel stove for many reasons:

- Durable non-porous material
- Easy to clean
- Expansion joints negate the risk of cracking
- Do not scratch or scorch when refuelling your stove or cleaning debris
- Single tiles can be replaced should accidental damage occur

Please contact us or your local stockist to arrange a **complimentary sample** in the post.
